## **BOOK SYNOPSIS**

Trauma-Attachment Tangle offers informative and inspiring clinical stories of children who have complex trauma and attachment issues from experiences such as adoption, hospitalization, or death of a parent. Some of these children display puzzling or extreme symptoms like prolonged tantrums, self-hatred, attacking their parents or being fearful of common things like lights, solid foods or clothing. Dr. Lovett presents strategies for unraveling the traumatic origins of children's symptoms and gives a variety of tools for treating complex trauma and for promoting attunement and attachment.
